INTRODUCTION

Anyone who might be expected to use this fire extinguisher should study and understand the information in this manual. Please read it completely and keep it accessible so that it may be reviewed on a periodic basis. OSHA requires training of personnel who might be expected to use an extinguisher in the case of an emergency. Familiarity with this manual and the instruction nameplate on the extinguisher will contribute to successful use of the extinguisher. You should know just what it CAN and CANNOT do, where it is located, how to use it and how to maintain it. Proper and effective use of any fire extinguisher begins with an understanding of the classes of fire. Different types are tested and rated for certain classifications, some for multiple classifications and others constitute a hazard if used on certain types of fires.

**TYPES AND CLASSES OF FIRES**

**IMPORTANT THINGS TO REMEMBER!**

NEVER DISCHARGE A FIRE EXTINGUISHER INTO ANYONE’S FACE

NEVER THROW AN EXTINGUISHER INTO THE FIRE OR LEAVE IT UNATTENDED IF THE FIRE IS NOT OUT

(Pressure build-up could cause an explosion from even a partially full extinguisher)

KEEP FIRE EXTINGUISHERS AWAY FROM CHILDREN

**DRY CHEMICAL, HALOTRON I, WET CHEMICAL (CLASS F) AND CARBON DIOXIDE EXTINGUISHERS**

These extinguishers are shipped factory charged. **Do not test your extinguisher** since even a small amount of discharge could cause it to lose pressure making it less effective or useless in case of a fire.

Wet Chemical (Class F) extinguishers are approved for use for fires involving cooking media.

Dry chemicals are non-poisonous but either the acidic based (ABE) or alkaline based (Regular or Purple K) chemicals could be an irritant if inhaled. If any physical discomfort is experienced, contact a physician immediately.

Halotron I should not be used in confined areas smaller than indicated on the extinguisher nameplate, food preparation areas or in the presence of people with cardiac problems. If problems occur, quickly remove the person from the area where the gas is present, apply artificial respiration and transport to a physician.

Carbon Dioxide is discharged as a gas (with small particles of snow) at extremely low temperatures and will displace oxygen. Care should be exercised in confined areas. If problems occur, quickly remove the person from the area where the gas is present, apply artificial respiration and transport to a physician. Avoid skin contact which could cause cold burns.

Dry chemical is not recommended for fires in delicate electrical equipment or aircraft. Use of this agent may extinguish the fire but may damage the equipment beyond repair.

Never use ABE dry chemical or Halotron I fire extinguishers on fires involving chlorine containing oxidizers (example: pool chemicals). A violent explosive reaction could occur with the mixture of chemicals.

**NOTE:** As required by OSHA law, Material Safety Data Sheets (MSDS) are available for all chemicals contained in these fire extinguishers. Contact your Amerex distributor or Amerex Corporation. In addition, the MSDS information is contained in a special section of all extinguisher labels. All MSDS are available on the Amerex website at www.amerex-fire.com.
**INSPECTION RECORD**

- **Model No:**
- **Serial No:**
- **Mfg. Date:**
- **Date Installed New:**

INSPECTION should be performed weekly by the owner, and every 6 & 12 monthly by the authorized service company. The extinguisher should be checked to see that it is not damaged, the discharge outlet is not blocked, and that the operating instructions are clearly visible.

** BI-ANNUAL MAINTENANCE** is a more complete inspection of the extinguisher and should be done professionally. It will reveal the need for hydrotesting which must be done on Water Mist, AFFF, & FFFP Foam, Wet Chemical, Dry Chemical Powders and CO2 every 5 years. The agents in Foam and Water Mist should be changed every 12 months. A service tag is required to be attached to the extinguisher on installation & then shows the service record provided by the authorized service agent.

**FIVE YEAR MAINTENANCE** – Five Year Hydrotest (unless it is a hazardous or extreme environment then it is 3 years). Every five years extinguishers shall be emptied and subject to thorough examination of mechanical parts, extinguishing agent and expelling means.

**RECHARGE** should be done professionally immediately after any use by your local Amerex Distributor who has the trained personnel, extinguishing agents and equipment to do it properly. This extinguisher must be recharged with the extinguishing agent specified on the nameplate. Substitutions could cause damage or injury.

**DISTRIBUTED BY:**

---

**INSPECTION** Your extinguisher should be inspected weekly by the owner and 6 & 12 monthly by the authorized service company, checking for any possible damage, corrosion, leakage or obstructions in the discharge outlet. The tamper seal should be unbroken. The extinguisher should be cleaned so that the instructions on the label are always clearly visible.

Carbon Dioxide extinguishers should be weighed and the weight verified to be within the tolerances specified on the nameplate (label).

**Water Mist, Water, Wet Chemical, Foam, Dry chemical, Halotron I** extinguisher pressure gauges should be checked. The indicator will vary slightly due to temperature, but should always be in the GREEN area if it is fully pressurized. Weigh the extinguisher to affirm that the full weight is within the tolerances stated on the nameplate.

**IN CASE OF FIRE**
1. Have everyone evacuate the area immediately.
2. Call the Fire Department even if the fire appears to be small (small fires quickly become LARGE fires). The Fire Dept. phone number should be posted at every telephone.
3. Use your extinguisher properly, according to the instructions on the nameplate and in this manual. A large fire should be fought by professionals. Be prepared to leave the area if the fire cannot be immediately controlled.

**REMEMBER THIS SIMPLE WORD – P A S S**

- **PULL** Aim
- **A**im
- **S**queeze
- **S**weep

---

**MOUNTING INSTRUCTIONS**

AS specifies that a hanging device must withstand a vertical force of four times the weight of the charged extinguisher. The extinguisher bracket should be mounted as follows:

- **Walls where 2”x4” studs can be found – ALL SIZES**:
  - Mount wall hanger bracket securely to stud using two #10 x 1 1/2” long wood screws through the diagonal smaller holes in the bracket.
- **Sheetrock – ALL SIZES**:
  - Mount a 3 1/4” thick board to the wall using 3/16” toggle bolts – height and width of the board should extend a minimum of two inches beyond all sides of the extinguisher profile (excluding hose & horn).
  - Mount wall hanger bracket to board using two #10 x 1 1/2” long wood screws as above.
- **Cinderblock or Cement – ALL SIZES**:
  - Mount wall hanger bracket using one ½” toggle bolt or masonry lead screw expansion anchor through center hole in the bracket. Mount vehicle/marine strap type brackets using two #10 lead screw expansion anchors.
- **Concrete or Tile Wall – ALL SIZES**:
  - Mount wall hanger bracket using one ½” Masonry lead screw expansion anchor through center hole in wall bracket.
  - Mount vehicle/marine strap type brackets using two No. 10 masonry lead screw expansion anchors.
- **Steel Posts or Beams – ALL SIZES**:
  - Mount vehicle/marine strap type brackets using two No. 10 masonry lead screw expansion anchors.
- **Tile Walls**:
  - Locate in joint.
- **Tile Walls**:
  - Locate in joint.

**HOW TO USE**

**NOTE:** The following instructions are of a general nature, intended to familiarize the user with the basic operating techniques of Amerex hand portable extinguishers. All operate by removing the ring (safety) pin and squeezing the handles together. Since extinguishers differ, the extinguisher nameplate must be consulted for specific procedures and starting distances.

1. Hold the extinguisher upright and pull the ring (safety) pin breaking the plastic seal.
2. Stand back from the fire (the minimum distance stated on the nameplate) and aim at the base of the fire nearest you.
3. Keeping the extinguisher upright, squeeze the handles together to discharge and sweep from side to side. Move closer as the fire is extinguished but not so close as to scatter the burning metal or liquid.
4. When the fire is out, back away while watching for possible re-ignition.
5. Evacuate and ventilate the area immediately after use. The fumes and smoke from any fire may be hazardous and can be deadly.

**NOTE:** Whenever possible, protective clothing and breathing equipment should be used while fighting a fire.

**1. HOLD EXTINGUISHER UPRIGHT AND PULL THE RING (SAFETY PIN)**

**2. STAND BACK FROM THE FIRE AND AIM AT THE BASE OF THE FIRE NEAREST YOU**

**3. SQUEEZE HANDLES TOGETHER & SWEEP THE EXTINGUISHER STREAM SIDE TO SIDE**

- **Wet Chemical (Class F)**
- **AFFF & FFFP Foam**
- **Dry Chemical**
- **Carbon Dioxide**
- **Halotron I**

**FIRE EXTINGUISHERS**

**AMEREX LIMITED 6 YEAR WARRANTY**

Amerex warrants its fire extinguishers to be free from defects in manufacture for a period of six (6) years from the date of purchase. During the warranty period, any such defects will be repaired or the defective extinguisher replaced IF THE ORIGINAL GREY TAMPER SEAL IS INTACT AND/OR IF ONLY FACTORY REPLACEMENT PARTS HAVE BEEN USED TO SERVICE THE EXTINGUISHER. This warranty does not cover defects resulting from modification, alteration, misuse, exposure to corrosive conditions, improper installation or maintenance. ALL IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO WARRANTIES OF FITNESS FOR PURPOSE AND MERCHANTABILITY, ARE LIMITED TO THE TIME PERIODS STATED ABOVE. IN NO EVENT SHALL AMEREX CORP. BE LIABLE TO INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow limitations on how long an implied warranty lasts, or the exclusion of incidental or consequential damages, so the above limitations or exclusions may not apply to you. Amerex Corp. neither assumes nor authorizes any representative or other person to assume for it, any obligation or liability other than expressly set forth herein. This warranty gives you specific legal right and you may have other rights, which vary from state to state. To obtain performance of the obligation of this warranty, write to Amerex Corp., P.O. Box 81, Trussville, AL 35173-0081 for instructions.
