

SMOKE-SABRE

Features

- More tests per can
- Faster detector activation and clearing
- Lowest cost per test
- The end of harmful residue - risk is designed out with the sabre
- Silicone free testing
- Eco-responsibility - 100% bio-degradable sabre, ozone friendly, no CFCs and low GWP
- Detector manufacturer endorsement
- UL and ULC Listed
- 150ml can

Description

Smoke-sabre™ is a major step forward in the design of aerosol smoke detector testers. All other pressurised aerosol smoke alarm testers have the inherent drawback that, if misused, they leave harmful residue on the casing and / or inside the chamber of the detector. This residue can discolour the detector plastic, can attract dust, affect sensitivity and, in some cases, lead to corrosion, cracking or even complete failure of the detector. Residue occurs when testing aerosols are used too close to the detector, or smoke alarm, despite instructions not to do so.

Smoke-sabre™ inhibits use too close to the detector and eliminates harmful residue while focussing and targeting the canned smoke test gas.

When smoke-sabre™ is in the closed position the sabre prevents access to the spray button. The aerosol can only be activated when the sabre is fully extended. In use, air is drawn through the holes in the sabre and this, coupled with the venturi effect involved, assists the velocity and vapourisation process of the airborne 'smoke' particles. The result is a more effective test, delivering better detector activation, using less gas per test, and reducing costs while eliminating harmful residue.

Other products may be recommended as best used with accessory devices to prevent spraying too close. With smoke-sabre™ there is no choice. The sabre is part of the product and cannot be used without it!

Smoke-sabre™ is a universal test product covering the sensitivity range of all smoke detectors (see particle size comparison chart).

The extending sabre is made of 100% bio-degradable plastic making smoke-sabre™ the only smoke detector test aerosol to be both recyclable and eco-friendly.

Smoke-sabre™ is UL listed, meets global testing standards, and is approved by major smoke detector manufacturers.
