

IN THE EVENT OF FIRE IN THE ENGINE COMPARTMENT AT THE REAR OF THE BUS

- A FirePro fire suppression system is installed on this bus.
- The fire suppression system is AUTOMATIC and will activate 60SECs after detection.
- If a fire is detected **CONTROL PANEL** will indicate and sound a driver only **red light and low level beeping alarm will sound.**

- The driver **when safe to do so** will stop the bus at the side of the road.
- **TURN OFF THE ENGINE** as soon as safe to do so.
- **EVACUATE PASSENGERS TO A SAFE AREA.**
- **60 Seconds** after the initial alarm the fire suppression system in the engine compartment will discharge the gas to extinguish the fire.
- The gas is white in colour and is based on potassium carbonate and will not harm humans; the gas will naturally dissipate to atmosphere.
- **Do not allow passengers back onto the bus.**
- Call the fire brigade, police or ambulance as required on 000.
